HELLER wins TWO awards at Apex 2001 San Diego, California

The Gen. 5 system met a significant industry challenge for removing flux from the environment by creatively applying new technology.

Additionally, the system was found to possess overall quality and consistency of performance in a package that has solid economical merits and throughput characteristics.

Heller salutes the efforts of Jim Neville and the entire Engineering staff on this innovative accomplishment.

HELLER WINS VISION AWARD

The SMT Vision awards have been established to recognize advances in technology and serve as a benchmark of excellence. Heller won the Soldering equipment category in recognition of our technological advancements for the Gen. 5 Flux Separation system on the 1800 EXL-S! The panel of industry experts concluded that

Vision Award Recipients

SERVICE EXCELLENCE AWARDS 2001

HELLER WINS SERVICE EXCELLENCE AWARD

Heller Industries, Inc. received the highest rating in the *Soldering* category for Dependability, Ease of Use, Responsiveness, Technology and Value for the Price. Many companies participated in this survey and the results are quite gratifying.

Some of the customer feedback included:

Heller makes a robust system that works great!" - Flextronics

"Training time is minimal, and the machine is very easy to operate" – Motorola

"The inline reflow ovens are very easy to use" and "We have made several additions to the ovens and have found Heller to be very accommodating" – Philips

Please contact Heller Industries for assistance should process or technical issues arise.
